HKIOA Technical Visit to Tai Ho Road Project

(Hearing Conservation Best Practices Award Scheme 2006)

The project won the **Excellence Award** in the Hearing Conservation Best Practices Award Scheme 2006 jointly organized by Occupational Safety & Health Council, Labour Department, Occupational Deafness Compensation Board and Pneumoconiosis Compensation Fund Board. China Overseas Building Construction Limited is the main contractor.

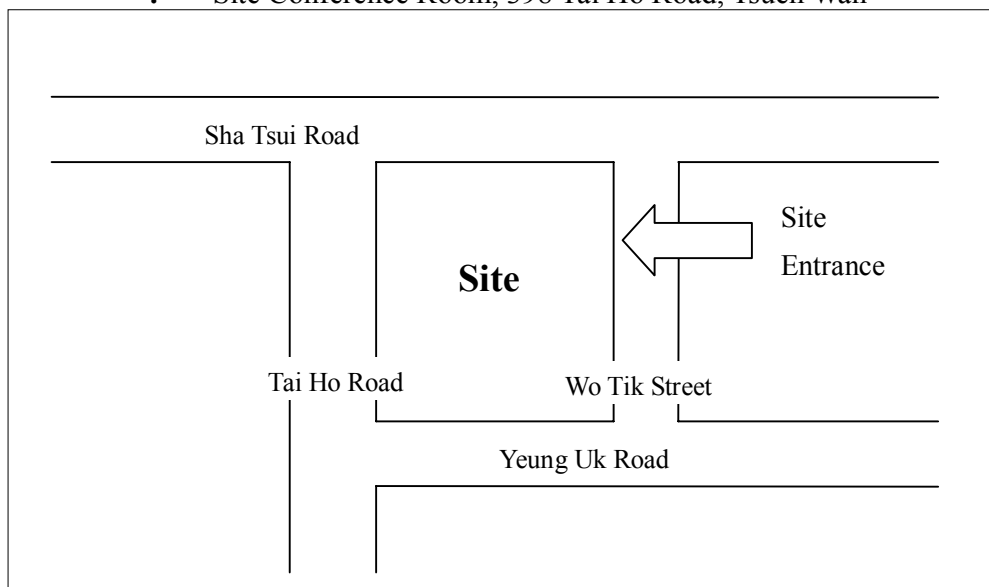

Description

The project management is committed to establishing and implementing innovative measures to reduce occupational noise exposure to construction workers as well as nuisance to the public. To promote experience sharing with other industry players, the project participated in the Hearing Conservation Best Practices Award Scheme 2006 and successfully won the Excellence Award.

The technical visit includes slide presentation and site walk. Administrative occupational noise control measures; details of a movable, modular noise barrier which is constructed on water filled road barriers as well as other interesting site arrangements will be introduced to the visitors.

Time & Date : 10:00am – 12:00 noon on 24 June 2006 (Saturday)

Venue : Site Conference Room, 398 Tai Ho Road, Tsuen Wan

Target participants : HKIOA members.

Due to space availability, the number of participants is limited on first-come-first-served basis.

Registration and Enquiries:

The site visit is free of charge. For registration, please send a blank e-mail to: reg2@wal.hk. A confirmation of the registration will be returned within 3 working days. Enquiries please send to the undersigned by who@wal.hk.
