Railway Noise Control Seminar 1: Implementation of Acoustic Measures in EMUs and Stations

(Jointly Organized by HKIOA, HKIEIA, BSE and ME Dept of HKPolyU)

Speaker: Dr Glenn Frommer
Venue: FJ302, Hong Kong Polytechnic University
Time: 6:30-7:45 pm, Wednesday, 10th January 2006

Planning of railway projects was highlighted in the Policy Address given by the Chief Executive in October 2006. In the same time, HKIOA and HKIEIA were planning to organize a Series of Railway Noise Control Seminars to raise the technical knowledge among our members and professionals. It aims at bringing the professionals, including planners, designers and practitioners together to share valuable experience on railway noise control. The seminar series is also supported by ME and BSE Dept of HKPolyU as the co-organisers.

It is our honor to have Dr. Glenn Frommer to present the first seminar in the series. As the Sustainability Development Manager in MTRC, Dr. Frommer is involved in many railway projects in Hong Kong and overseas. In this seminar, he will focus on Implementation of Acoustic Measures in EMUs and Stations using EIAs as the connecting theme. Glenn will review the methodologies first introduced with the Lantau and Airport Railway over a decade ago. If you would like to know what he will present, please come and contribute your views.

There will be total of 8 to 10 seminars in railway noise control series in Year 2007. The first 4 seminars have been scheduled as shown below.
