

A Seminar on

Making Sense of Tranquility in Hong Kong Urban Setting

Tranquility is primarily a natural resource. Like sounds and landscapes, it can be enhanced and enjoyed by a population. In a densely populated, heavily built modern metropolis like Hong Kong, **tranquility is scarce and its distribution is uneven.**

The human experience of tranquility and the environment is central to our health and wellbeing and provides inspiration for many aspects of livelihood. **Tranquility can indeed be found in urban areas – in parks, gardens, preserved nature reserves, etc.** These green urban areas are a precious resource which should be safeguarded.

You are all invited to come and participate to see what role you can play in protecting and reclaiming tranquility for the benefit of us all. **Participation is Free.**

Date: December 7, 2012

Venue: Room 422, Wong Foo Yuan Building, The Chinese University of Hong Kong

Time: 2.30pm to 5.30pm

Speakers will include:

- Professor Lam Kin Che (Adjunct Professor, CUHK)
- Dr Kin Cheng, Chairman of HKIOA)
- Professor Greg Watts (University of Bradford, UK)
- Professor Yuan, Xiomei (South China University of Technology)
- Ingr. Maurice Yeung (EPD, HK)
- Professor Lawal M. Marafa (CUHK)
